

PVRpilot

PC and PVR in your home network

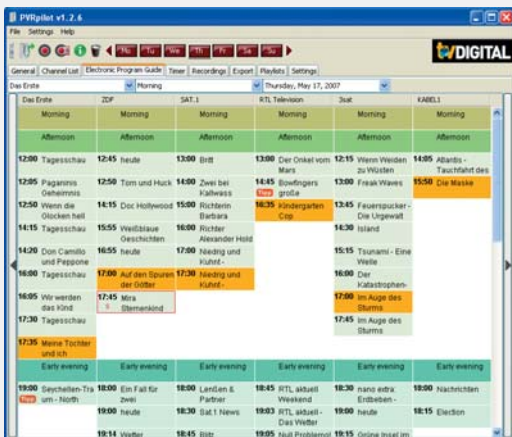

PC Software for the Set Top Box

PVRpilot is a PC tool that allows to use some selected functionality of the PVR on the connected PC. It also extends the functionality of the PVR in a considerable way.

PVRpilot converts the PC and the connected PVR into a home media network which allows to stream recordings or live TV programs from the PVR to the PC system. It allows to burn the recordings onto a connected DVD as well as to access EPG and other information provided by the PVR.

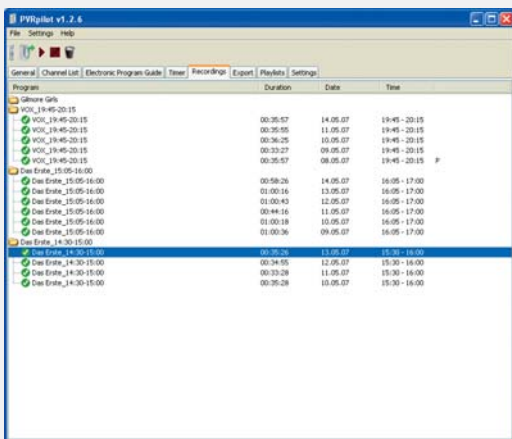

Thus, the PVRpilot is in all cases a valuable extension of the features of a PVR system.

Screenshots of the software

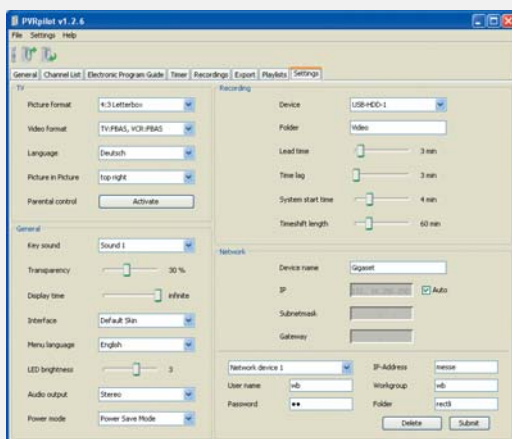

EPG

All EPG Data well sorted.
Schedule a recording directly clicking on the program.

RECORDINGS

Administrate your recordings comfortable on the PC.

SETTINGS

Choose all settings of the Set Top Box via PVRpilot.

Functionality of PVRpilot

LiveTV and Streaming

Display Live TV and recorded programs on the PC

Remote Programming of recordings

Schedule recordings on the PVR using Internet access to the PVR, i.e. access the PVR from office and on the go using mobile phone (needs an integrated web browser)

Electronic Program Guide (EPG)

- Program listing for 6 channels in parallel
- Schedule single and series recordings on the PC
- The currently playing live TV and the scheduled recordings are highlighted on the screen
- Detailed EPG information, ratings and recommendations are available for many programs (in combination with managed EPG from TV Digital)

DVD archiving

Recordings can be archived on DVD. For this, the PVRpilot generates an ISO image that can be burned onto DVD.

SmartCenter

- Set Top Box can be configured using the PVRpilot tool
- Settings can be stored and transmitted to other Set Top Box systems
- Channel lists and favourite lists can be uploaded / downloaded to an Internet server
- Playlists can be defined and handled in a very comfortable way

Timer management

Timers for single and series recordings can be managed and modified on the PC

Recordings management

- Segmentation and annotations can be done for recordings that are stored on the PVR
- Recordings can be renamed and deleted from the PVR hard disc

The PC software PVRpilot

The PC software PVRpilot supports the networking functionality of the connected Set Top Box system and allows a comfortable and easy access to all the functions of the connected PVR. A free test version providing limited functionality is provided at www.pvrpilot.com.

The full version of PVRpilot for different PVR systems is available for download at www.pvrpilot.com.
